duality of patterning / double articulation

Roughly speaking, DoP refers to the fact that the meaningful units of language – words or morphemes – are made up of meaningless units – phonemes or features – whos only function is to distinguish the meaningful units from one another.

Ladd 2012, 261.

The word has no division, how can the meaning have any? But the ignorant person sees division through artificial splitting. Just as, in a compound, *brāhmaṇakambala*, the term *brāhmaṇa* has no meaning, in the same way, in a sentence, words like Devadatta are without a meaning.

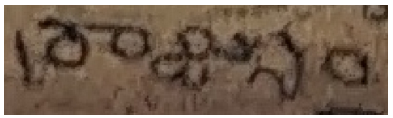

Vākyapadīya II.13–14, trans. Subramania Iyer 1977, 6–7.

Tokenizing a text

Use this tool to experiment with tokenizing a text in different ways. The input can be in IAST/Madras Lexicon transliteration or in Bengali, Burmese, Devanagari, Grantha, Malayalam, Newa, Sarada, Sinhalese, Tamil, Telugu, Tibetan, or Ge'ez script. Some options will additionally work for other scripts.

▶ Sample texts

யாயா கியளே மாஅ யோளே மடைமாண் செப்பிற் றமிய வைகிய

Tokenize

▼ Tokenize by

- ○ Whitespace
- ○ Unicode word boundaries
- ◉ Unicode grapheme
- ○ Syllables/Akṣaras (conjuncts and vowels together)
- ○ Eḻuttu (without conjuncts)
- ○ Consonants and vowels separate

List of characters†

1 Species of the victim: [0] animal [1] human

2 Type of animal: [0] goat [1] rabbit [2] duiker [3] sparrow

3 Victim is [0] multiple [1] single

4 Sex of the victim: [0] male and female [1] female [2] male

5 The victim wears a red cap/hood: [0] absent [1] present

6 Relationship of the guardian to the victim: [0] mother [1] brother [2] grandmother [3] father

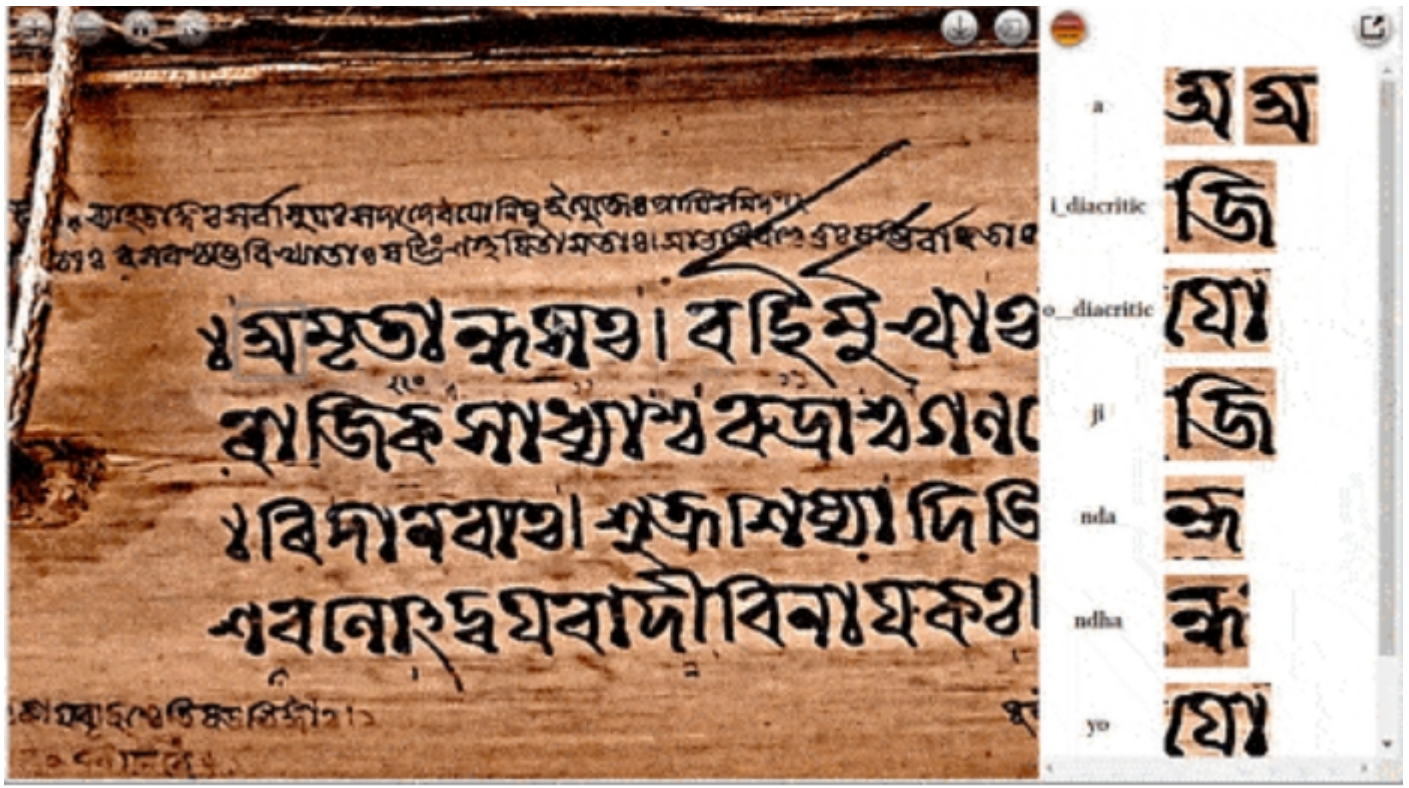

7 The species of the villain: [0] fox [1] ogre [2] wolf [3] tiger/leopard [4] lion [5] bush beast [6] hyena [7] bear [8] alligator [9] crow

8 The sex of the villain: [0] male [1] female

9 The relationship of the villain to the victim: [0] stranger [1] father [2] aunt/uncle [3] friend

Tehrani 2013, supplementary material.

What differences did we ignore?

github.com/chchch/quick-palaeographer

What assumptions did we make?

What assumptions did we make?

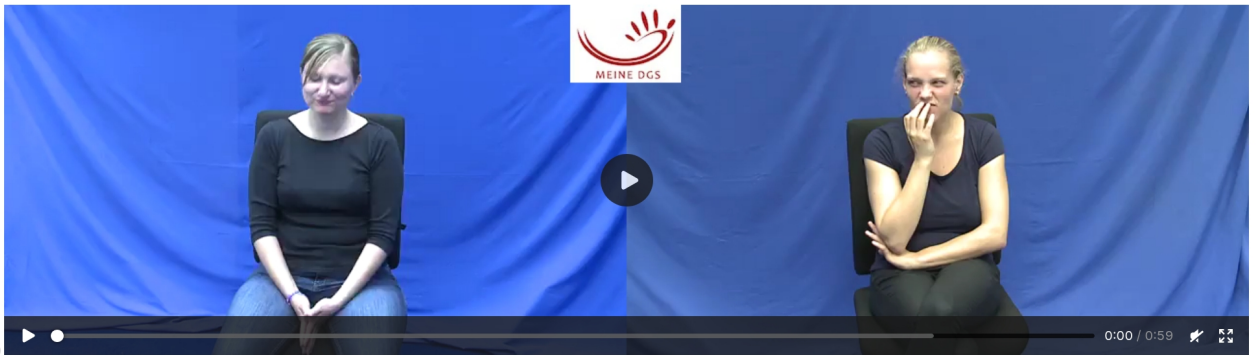

- our texts are from spoken languages, with a linear, phonemic script
- only one phoneme can be spoken/written at a time

…and those who write down the Vedas, they will surely go to hell.

Mahābhārata Anuśāsanaparvan 24.70, ed. Sukthankar et al. 1966, 188.

Il gesto uccide la parola.

Congresso Internazionale per il miglioramento della sorte dei sordomuti, Milano 1880.
Volterra 2014, 426.
